

## So what is an AmazedDerma Roller?

The **Amazed Derma Roller** is an incredible device which naturally increases the levels of collagen and elastin in your skin. Stretch marks, wrinkles, scars and uneven, pitted skin are all due to a lack of collagen – so by using an **Amazed Derma Roller** to replace the collagen you can help your skin renew itself and repair to a cosmetic level.

### Use an Amazed Derma Roller for:

- Stretch Mark Removal and Stretch Mark Treatment
- Acne Scar Removal / Acne Scar Treatment
- Anti Wrinkle Treatment / Anti Aging
- Hair Loss Treatment or Hair Restoration
- Surgical Scar Removal
- Cellulite Treatment and Cellulite Reduction

### Does Derma Rolling really work?

Skin micro-needling (otherwise known as CIT or collagen induction therapy) is an increasingly common cosmetic procedure, but the **Amazed Derma Roller** is an FDA approved application which is simple and easy enough to use yourself at home. In fact, it has very similar results to Laser Treatment, Chemical Peels and Dermabrasion, but is considerably less invasive (without any of the skin trauma) and carries only a fraction of the cost. Even the stars of Hollywood are having **Amazed Derma Roller** treatments to rejuvenate and smooth their skin.

### How do you use an Amazed Derma Roller?

Using an **Amazed Derma Roller** is a very simple process and can be carried out in the comfort of your own home.

### How long before I see results from my Amazed Derma Roller?

The rate at which you will get results depends on what condition you are treating and how extensively your skin needs to remodel. This process of skin re-modelling can continue for literally months after each **Amazed Derma Roller** treatment, but visibly noticeable changes can be seen within a week! Your skin naturally renews itself every 40 days, so with a little stimulation, changes can be dramatic and fast.

### Can you use an Amazed Derma Roller on any part of your body?

Micro-needling can be carried out with an **Amazed Derma Roller** on almost any part of the body: the arms, hands, legs, thighs, body, abdomen, neck, face, cheeks, scalp, even around the eye area – such as crows feet and frown lines.

### Is the use of an Amazed Derma Roller safe?

Of course. Based upon ancient oriental acupuncture techniques, micro-needling has been used for literally hundreds of thousands of procedures with no serious side effects reported. The **Amazed Derma Roller** is FDA approved, and manufactured / quality controlled in accordance with ISO/CE/FDA standards. The product is gamma sterilised according to ISO 11137.

### Does the skin rolling process hurt? or make you bleed?

No! There are two alternative methods of Derma Rolling. One method involves the use of numbing cream to completely numb the area to be treated, followed by more aggressive use of the **Amazed Derma Roller** once per week. The second alternative, involves using the roller with light pressure up to 5 times per week without numbing cream. Using your roller gently gives a kind of tickling feeling and is not painful – although your face is more sensitive to it than your body. Neither of the methods should draw blood. You may find that there is a temporary reddening of the skin for around an hour after treatment and it can give a sensation similar to mild sunburn. We recommend the use of vitamin rich treatment cream after use, and sunscreen / block if you will be exposed to the sun after treatment.
